

**Márton Zwillinger** was born in Hungary, in 1993. He performed his B.Sc. diploma thesis work in the research group of Zoltán Novák at Eötvös University at Budapest. During his bachelor studies he dealt with *N*-donor ligand directed C–H activation reactions. Márton performed his M.Sc. diploma thesis work concerning isotope labeled quinoline derivatives in the research group of Professor András Kotschy at Servier Research Institute of Medicinal Chemistry (SRIMC), Hungary and graduated in 2017. He performed his PhD research work at SRIMC as a student of Eötvös Loránd University. He dealt with the synthesis and application of various quinoline based foldamer building blocks. Currently he is employed by Servier as a medicinal chemistry researcher.
